## RESOLUTION No. 9

### "ENERGY DEVELOPMENT AND ENVIRONMENT CONSIDERATIONS"

WHEREAS, the favorable economic climate of the United States has been fostered, in part, by the free enterprise development of the Nation's energy resources; and

WHEREAS, the healthy economic climate of the United States is of paramount importance to the continuing of our Democracy; and

WHEREAS, there is some inevitable conflict with the status quo of the environment by energy development:

BE IT THEREFORE RESOLVED, that the Legislative and Executive branches of both the Federal and State governments give equal, equitable and logical consideration to all factors of the Nation's environment - a major part of which is the general welfare and freedom of its peoples - before enacting and enforcing laws that give biased consideration to the forces opposing reasonable energy development programs.

ADOPTED, this 9th day of December, 1976.
